

Course Syllabus

Introduction to GitHub Copilot with Python

We are glad you have joined us for this course! Here is some information that will help you to navigate your learning platform and locate course content.

Joining the Session

Before the first live session, please confirm that you can access Zoom:

1. Visit <https://support.zoom.us> and click on **Getting Started**.
2. Attn Percipio Users - The **Join live course** option is available where you registered for the session in Percipio 15 minutes prior to the start of class.

Course Description

GitHub Copilot is the best tool for developers both novice and professional. Copilot is backed by both GitHub and Microsoft. Although Copilot is now capable of handling almost all popular programming languages, we focus on Python for this demonstration. Copilot also can reference official documentation, popular coding forums, public repositories and public data. This gives programmers a powerful tool that they can use in day to day coding.

Target Audience

Although no programming experience is necessary, some knowledge of programming environments will help. This short boot camp is targeted to anyone who wants to become a Python programmer using AI. Also, anyone with a curiosity about AI tools are welcome to join.

Objectives

- After completing this course participants will be able to build a Python programming environment using the Linux OS.
- Learners will be able to use GitHub Copilot to solve common Python programming problems.
- Participants will be able to construct prompts to get answers from Copilot
- Users will be able to build a working foundation for a Python application using Copilot

Agenda

Note: there is no formal agenda as the tool can take the session into multiple directions. Also, the tool is constantly changing, almost monthly. Below is just a general guideline we will follow.

Hour 1 and Hour 2

Environment setup

Starting a Python application

Working with functions and classes

Adding API endpoints

Securing the endpoints

Technical Support

We offer 24/7 support if you need assistance with your Percipio learning platform. To access support, click the initials of your profile and select “Help”.
